

1. Entities: television shows,  
television networks,  
cities,  
channels,  
show times,

Assumption: a channel in a city is associated with a network  
a show is either owned by a network or a local show

Combining everything from previous page ...

2. Parts ( number )

Assembly ( number , cost )

Composed Of ( assembly - number , part - number , quantity )

3.

Use the chase Test

$$\{A \rightarrow BC, CD \rightarrow E, B \rightarrow D, E \rightarrow A\}$$

$\Downarrow$

$$\{A \rightarrow B, A \rightarrow C, CD \rightarrow E, B \rightarrow D, E \rightarrow A\}$$

	A	B	C	D	E	F
R1	A	B	C	d1	e1	F
R2	A	b2	c2	D	E	F2

$\downarrow A \rightarrow B$

	A	B	C	D	E	F
R1	A	B	C	d1	e1	F
R2	A	B	C2	D	E	F2

$\downarrow A \rightarrow C$

	A	B	C	D	E	F
R1	A	B	C	d1	e1	F
R2	A	B	C	D	E	F2

$\downarrow B \rightarrow D$

	A	B	C	D	E	F
R1	A	B	C	D	e1	F
R2	A	B	C	D	E	F2

$\downarrow CD \rightarrow E$

	A	B	C	D	E	F
R1	A	B	C	D	E	F
R2	A	B	C	D	E	F2

Notice R1 is now same as R

Thus, we can obtain original relation

R from R1 and R2. Therefore,

the decomposition is lossless.

4.

$$A \rightarrow B, \quad C \rightarrow A$$

$$\begin{pmatrix} a_1 \rightarrow b_1 \\ a_2 \rightarrow b_1 \end{pmatrix} \quad \begin{pmatrix} c_2 \rightarrow a_1 \\ c_1 \rightarrow a_2 \\ c_3 \rightarrow a_2 \end{pmatrix}$$

(Note  $C \rightarrow B$  can be implied from  $C \rightarrow A$  and  $A \rightarrow B$ )

5. (a)  $\{A\}^+ = \{A, B, C, D\}$

$$\{B\}^+ = \{B, D\}$$

$$\{C\}^+ = \{C\}$$

$$\{D\}^+ = \{D\}$$

$$\{E\}^+ = \{A, B, C, D, E\}$$

Thus E is a candidate key

(b)  $\{B, C\}^+ = \{B, C, D, E, A\}$  ( $\because CD \rightarrow E$  and  $E \rightarrow A$ )

thus BC is a candidate key

6.

$$\{A\}^+ = \{A, B, C, D, E\}$$

$$\{B\}^+ = \{B, D\}$$

$$\{C\}^+ = \{C, E\}$$

$$\{D\}^+ = \{D\}$$

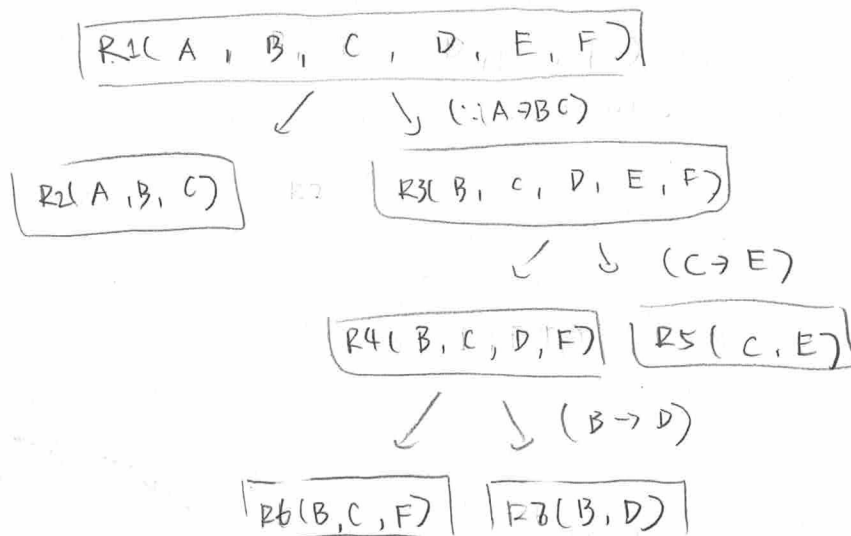

$$\{E\}^+ = \{E\}$$

$$\{F\}^+ = \{F\}$$

AF is a candidate key.

A relation is in BCNF iff every FD is an arrow out of a candidate key.

So No, this is not in BCNF.

Set of relations in BCNF:

$$\{R_2(A, B, C), R_6(B, C, F), R_7(B, D), R_5(C, E)\}$$
